Ultracel
Grain Body

THE CIM ULTRACEL

The CIM Ultracel Grain Body is a combination from the best of two proven designs. The cross member floor provides the best in strength and durability while minimizing overall box weight providing better strength per weight ratio than smooth bottom grain body. The unwelded construction of sloped ribs and continuously welded internal seams prevents moisture from seeping between the sides at the floor and eliminates rust. The Ultracel is simply providing a combination of the best of both designs to meet today's farming needs.

STANDARD SPECIFICATIONS FOR CIM ULTRACEL

- 42" – 48" – 55" – 60" – 65" Wall Heights
